## O módulo da Impedância

$$|Z| = \sqrt{(Z')^{_2} + (Z'')^{_2}}$$

## Circuito RC paralelo

$$Z=rac{R}{1+\omega^2 au^2}-irac{\omega au R}{1+\omega^2 au^2}$$

## Soma de erros Quadrados entre a curva experimental e a do modelo.

$$s = \sum_i \omega_i' [(Z_i')_{exp} - (Z_i')_{model}]^{\scriptscriptstyle 2} + \sum_i \omega_i'' [(Z_i'')_{exp} - (Z_i'')_{model}]^{\scriptscriptstyle 2}$$

## peso

$$\omega' = \omega'' = rac{1}{|Z|}$$
